## POST-PRODUCTION QUALITY SERVICES

### Inspection Services

Q2 Management Inc. offers fully managed product inspection services at your location or, if required, at our warehouse facilities.

### Third-Party Containment

Q2 Management Inc. offers a third party containment option. Our comprehensive services include; personnel training, validation and supervision, development of inspection instructions as well as containment data analysis. We will also provide further assistance with root-cause analysis, troubleshooting and permanent corrective actions.

### Rework/Light Assembly

Q2 Management Inc. offers rework and light assembly outsourcing options on-site or at our facilities with full logistics support as either a stand-alone service or congruent with ancillary inspection activities.

## ADVANCED QUALITY SERVICES

### Customer Representation

We have qualified and experienced staff available to support suppliers at their customers' locations in response to unforeseen challenges and assist in the management of customer relationships. This is especially relevant during launch activities and program changes.

### Contract Engineering/Launch Support

Unanticipated quality engineering requirements? We provide skilled quality staff available for short and long term projects in response to your demand requirements. Qualified resources can be deployed to cover all APQP aspects including process documentation development, customer interface and overall program management without increasing your permanent staff.

### Supplier Quality Management

Q2 Management Inc. offers assistance in managing the quality and delivery performance of your supply base. Structured quality system audits include in-depth reviews of PPAP, PFMEA and Control Plan documentation and program-launch readiness assessments. Supply base management services are available independent of additional third-party containment activities, or as required.
